Computational social science:
linking online behaviour with
real-world economic phenomena

A close-up photograph of the Google logo on a white surface. The letters are in their characteristic colors: blue, red, yellow, blue, green, and red. Below the 'le' part of the logo, the letters 'UK' are visible in a smaller, black font. The background is a dark, grid-like pattern, possibly a computer screen or a wall with a grid.

Possibilities

- Intrinsic qualities of the data
 - Spatial: e.g. location of recent events
 - Temporal: e.g. recent frequency
 - Links to the other CPC data sets
- Interactions with other real world data
 - Transport patterns
 - Purchasing behaviour
- Interactions with online data
 - Search behaviour
 - Social media
